Professional summary

Versatile public-service professional transitioning into software engineering with hands-on experience building and publishing web content, automating reporting, and delivering technical projects. Skilled in HTML, CSS, JavaScript, Python (OOP), Agile workflows, UAT, and WCAG-compliant web publishing. Focused on shipping reliable, accessible front-end experiences and small automation tools.

Technical skills

Languages & frameworks: HTML, CSS, JavaScript, Python (OOP), Java, SQL

Web & tooling: Responsive design, WCAG accessibility, content management, UAT, Git, Create React App / Vite (familiar)

Data & automation: Excel (macros, VLOOKUP), basic scripting for reporting automation

Cloud / deployment: Static site deployment workflows (Netlify/Vercel concepts)

Other: Agile SDLC, stakeholder engagement, bilingual content (English / French compliance experience)

Selected projects

Ontario Region Hub - Internal site redesign

- Led the end-to-end redesign and launch of the Ontario Region Hub internal communications site serving 250+ staff of the Business Enquiries division of the Canada Revenue Agency.
- Implemented pages using HTML/CSS/JavaScript, coordinated UAT with management and reviewers, and ensured WCAG accessibility and bilingual compliance.
- Delivered training and rollout materials; received formal recognition from senior leadership.

Automated reporting tools for operational improvements and decision making

- Built Excel macros and automated VLOOKUP workflows to consolidate and automate reporting for return-to-office logistics and operational KPIs.
- Reduced manual reporting time and improved data accuracy for regional management decisions.

Portfolio / personal site (example project)

- Small React SPA showcasing projects, resume, and contact form; structured for fast deployment to Netlify with a simple build pipeline and responsive, accessible UI.
- Demonstrates componentized layout, routing, and static asset management.

Relevant experience

Canada Revenue Agency - Senior Business Services Agent (Acting) / Taxpayer Services Agent Toronto, ON | Dec 2021 – Present (roles overlapped; promoted to acting SP-05)

- Resolved high volumes of complex taxpayer enquiries and escalations while maintaining strict confidentiality and compliance.
- Secondary assignments focused on digital publishing and web development: authored and maintained internal web pages, performed UAT, archived content, and implemented accessibility improvements.
- Coordinated cross-functional stakeholders, produced trend analysis reports for management, and automated routine reporting tasks with Excel macros.

Other roles (selected secondary assignments)

- **Program Support / Content Author / Project Lead (CRA)** — managed ATIP processing support, onboarding IT access, and internal communications.
- **SkipTheDishes - Canadian Market Care & Logistics Specialist** — supported SaaS projects and escalated logistics issues.
- **Walmart Canada — Department Manager** — team leadership and KPI analysis.

Education

- **Software Engineering Technology Advanced Diploma (in progress)** — Centennial College, Toronto (current)
- **MA, Media Production** — Toronto Metropolitan University
- **MBA, Marketing** — Atish Dipankar University of Science and Technology, Dhaka
- **BBA, Marketing** — Atish Dipankar University of Science and Technology, Dhaka

Languages English (fluent; IELTS 8.5), Bengali, Hindi, Urdu (fluent)

Selected achievements

- Received multiple formal commendations from senior management and executives for service excellence and project delivery.
- Led a region-level site redesign with positive stakeholder feedback and measurable improvements in internal communications.
- Built automation that improved reporting efficiency for regional operations.
